In development countries, we know there are several developments in many sectors. In Indonesia there are many sectors are developed so fast, for example : garment sector, food product, house holding product etc.

Like in Jakarta we can see many houses , shops, supermarket and companies which are very busy making many kind of product, Their products just for this country, I think they must make their products for the other countries in the world next time. For that opportunities we must prepare our man power to have good skill in there sectors for exporting commodities, we have to prepare professional people who will manage that skill like professional managers, professional employees and professional skills.

There are many kind of there sectors above like : crackers food, cat food, sweeten fruits, spices ready to cook, dried vegetables, costum ready to wear, many kinds of house of holding products like bed cover, interior, clothing design etc.

we can produce many export products to all countries in the world.
