We are aware together that mother is a "key" in family life and household. She was constantly struggling with a householdness problems, about : "livelihood", household management, childcare and their education, family finance, etc in daily living problems.

It's right to place if the family building program, are many things to be addressed for deceiving to mother. With notice that family has a role and responsibility too toward environment around of the household. Therefore family as unity has a task and responsible too far to notice the environmental cleaning and healthy at around their houses.

So not only the bounds of our yardfence to take a good care the environmental cleanliness and healthy. These things could support the form of ecosystem equilibrium.

Some problems in environment which always are felt by families are : (1) Population migration from village to a big city (2) The changing in disease patern, (3) there is flooding and natural disaster, (4) increasing in criminal cases.
