

**1-21. A Taxonomic Review of the Tribe Enicospilini
(Hymenoptera: Ichneumonidae: Ophioninae) from Korea**

Ki bum Kim*, Jong Chul Jung and Jong Wook Lee

Department of Biology, Yeungnam University

The Tribe Enicospilini in Korea was taxonomically studied. In Korea the Enicospilini comprise 22 species of 4 genera; *Dicamptus* Szépligeti, *Dictyonotus* Kriechbaumer, *Enicospilus* Stephens, *Stauropoctonus* Brauns. Two species, *Enicospilus melanocarpus* Cameron and *Enicospilus pseudoconspersae* (Sonan), were newly recorded in Korean Enicospilini. The key to species, distribution and host data of species, and figures for identification are given.
