

**IPOWER 500 of Chinese Enterprises and Enterprise
Informatization Evaluation System
(Hu Jiansheng, NiEC ,China)**

In the time of economic globalization, Chinese enterprises are facing with unprecedented challenges as well as the opportunities. With almost 10 years of development of enterprises informatization, we have acquired some experiences and we also have learned some lessons.

To evaluate the level of Chinese enterprise informatization with accuracy and objectivity, and to understand the growth capacity of Chinese enterprises in the time of information, is a subject attracting attentions not only from Chinese government but also from all levels of the Chinese society. The subject is understood as the key task for a healthy development of Chinese enterprise informatization.

Content of this report includes: 1) why NIEC proposed to conduct a ranking in terms of enterprise informatization capacity? 2) the theory foundation for IPOWER500 evaluation; 3) the evaluation results of IPOWER500; 4) the constitution of IPOWER500 enterprises and characteristics of their informatization development; 5) development of China National Informatization Indicator System as well as the theory and practice of China's Enterprise Informatization Indicator System. The report introduces the status of China's enterprise informatization development and exchanges research methods and results in fields of enterprise informatization and electronic commerce with Korean counterparts.
