Conflict of Interest

The authors have no financial conflicts of interest.

Pediatr Gastroenterol Hepatol Nutr. 2022 May;25(3):276-282

<https://doi.org/10.5223/pghn.2022.25.3.276>

On page 276 of this article, there was a typo error at the abstract. The authors would like to correct last sentence of the conclusion part in the abstract.

Before:

Conclusion: The incidence of infantile colic in Thai infants in our study was 6.5%, which is similar to that in other reports. Being exclusively breastfed for the first two months was the only risk factor in our cohort.

After:

Conclusion: The incidence of infantile colic in Thai infants in our study was 6.5%, which is similar to that in other reports. Being non-exclusively breastfed for the first two months was the only risk factor in our cohort.

The authors would like to apologise for any inconvenience cause.
